

北方工业大学
North China University of Technology

School Introduction

North China University of Technology (NCUT), located in Beijing, the capital of China, is a public university that offers Bachelor's, Master's and PhD programs in the fields of Engineering, Sciences, Liberal Arts, Economics, Management and Law. Currently, there are over 600 international students from more than 70 countries around the world who are taking Chinese language program and Degree programs.

Understanding Contemporary China

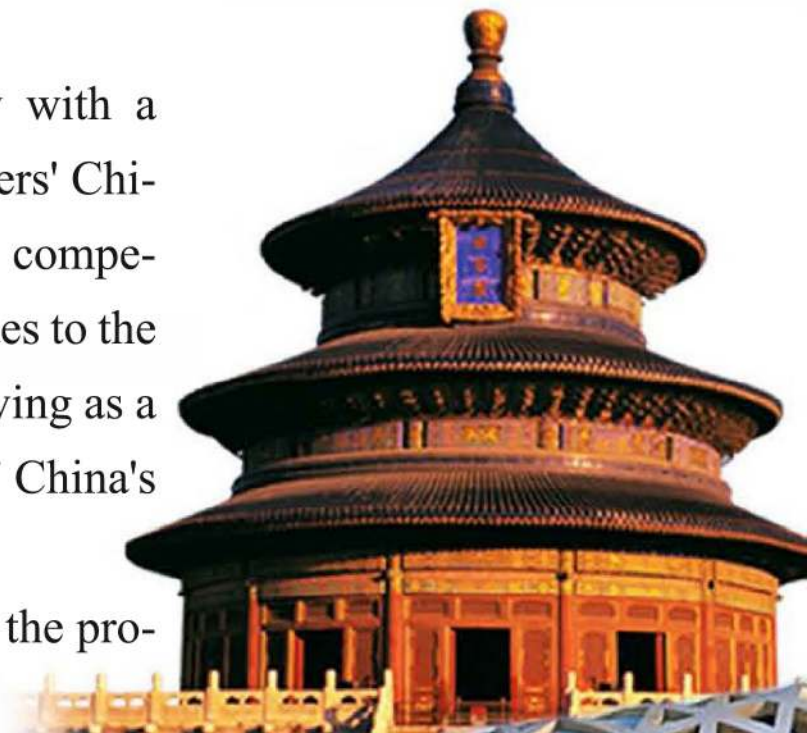

Duration: Aug.2 to Aug.29

Program Introduction:

This program supports the international communication of Chinese-style modernization from multiple dimensions, including language teaching, practical experience, and resource sharing. By adopting multimodal teaching methods and authentic audio-visual materials, it comprehensively presents the outlook and development achievements of contemporary China around themes such as politics, economy, culture, science and technology, ecology, and the Belt and Road Initiative. It helps international learners understand China's national conditions, governance philosophy and the practical logic of modernization, and grasp the profound logic and Chinese wisdom underlying China's development.

Meanwhile, from the perspective of a community with a shared future for mankind, the project improves learners' Chinese proficiency and cross-cultural communication competence. It explains China's modernization path and values to the outside world in an intuitive and systematic way, serving as a typical educational practice for telling the story of China's modernization effectively.

All the participants will receive the Certificate when the program finishes.

Program Features

1

This program scientifically groups students according to their Chinese language proficiency and adopts a small-class teaching model, with a focus on improving students' practical language application abilities and helping them accurately tell China's stories in Chinese.

2

Guided by the concept of multi-modal teaching, the course uses abundant authentic audio-visual materials and covers core themes including the Chinese Dream, rural revitalization, low-carbon emission reduction, and scientific and technological innovation, presenting the true face of contemporary China from multiple perspectives.

3

The program includes practical components by organizing international students to conduct field visits to new rural development areas and high-tech innovation enterprises. Combining classroom instruction with scenario-based seminars, it guides international students to systematically understand China's national conditions, institutions, policies and development logic, fosters their global vision and cross-cultural awareness, helps them objectively convey China's voice, and promotes mutual learning between Chinese and foreign civilizations.

4

This program has prepared a variety of Chinese cultural programs, including calligraphy, paper cutting, Peking opera, tai ji, etc., and has also arranged weekend visits to the Forbidden City, the Great Wall, the Summer Palace, and so on.
